Measurement Guide

Depth:

Measure the top of your gutter from front to back. This determines the gutter depth. It should be 5" or 6" depths. The standard Leaf Defier® insert fits all 5" and 6" K Style gutters. Half-Round Styles are available in various sizes. Leaf Defier® has the capacity to create any custom size and specialty shape you need.

Linear Feet:

Measure the length of the existing gutters on your house to determine linear feet. Leaf Defier® is available in 4' sections.

Easy Installation

Slide Leaf Defier® under or over the existing gutter spikes and pull across the length of the gutter.

Leaf Defier® slides right over the downspout area with the open channel underneath to allow the water to flow through. It's that easy!

Leaf Defier® WILL NOT void any roofing or siding warranties, since there are no roofing nails, tar or tacking required.

Leaf Defier®

Gutter Protection System Patent Pending

Factory Treated With **NEW Advanced Protection™** Process

- EXTREME DEFIANCE™ COATING**
high-performance multi-polymer coating provides superior protection against extreme weather conditions
- BIOCIDE & FUNGICIDE**
inhibits growth of mold, mildew, fungus, algae and moss
- UV STABILIZER**
prevents degradation from the sun

25 YEAR NO CLOG WARRANTY
Gutters Remain Clean & Clear of Clogs

Leaf Defier® Advantages . . .

Form, Function & Design

The Leaf Defier® is an open cell multi-polymer insert, specially shaped and cut to fit snugly into your gutter. Even during the heaviest of rainstorms, the water flows through the Leaf Defier® into the gutter valley and out the downspout.

Leaves and debris slide off the surface or just dry up and blow away. Your gutters will remain clean and clear of clogs.

Proven Technology

This product has been successfully installed in thousands of homes across the nation, protecting them from all types of extreme weather conditions.

The Leaf Defier's® patent pending material is factory treated with the new Advanced Protection™ Process. This three-step treatment begins with **Extreme Defiance™ Coating** – a high-performance multi-polymer treatment that provides superior protection against the most extreme weather conditions. Next, a **Biocide and Fungicide** that inhibits the growth of mold, mildew, fungus, algae and moss in Leaf Defier's® material. And finally, a **UV Stabilizer** that prevents degradation from the sun.

Lightweight & Flexible

The Leaf Defier's® lightweight and flexible design make installation a dream for the homeowner or contractor. Just slide Leaf Defier® under the existing gutter spikes and pull across the length of the gutter. No hardware or additional tools are needed. It's that easy!

Leaf Defier® works like no other gutter protection

Clogged gutters can cause water damage to your home. Install Leaf Defier® and protect your home from foundation problems, basement leaks, rotting windows, rotting fascia boards and soffits, mold and mildew, and insect infestation.

Our sleek and streamlined design is virtually invisible once installed and will not interfere with the beauty of your home.

Leaf Defier® in Action...

Leaves and debris slide off the surface or just dry up and blow away.

Leaf Defier® is factory treated with the new Advanced Protection™ Process

- Extreme Defiance™ Coating
- Biocide & Fungicide
- UV Stabilizer

Even during the heaviest of rainstorms, water flows straight through the Leaf Defier® into the gutter valley and out the downspout.

Regardless of your roof pitch, Leaf Defier® handles the MOST water intake of any gutter protection system in the industry.

Open cell multi-polymer gutter insert utilizes 100% of the gutter capacity to allow maximum water intake.

An absolutely worry-free, maintenance-free, cost-effective gutter protection system.
